ABOUT US

MARINE MARKET

NAVY INDUSTRIES

STEEL STRUCTURES / SERVICES

SEC SYSTEMS is the leading manufacturer of interior systems for marine, naval, offshore, and not limited to mentioned. The Company is represented by a team of qualified managers, the foundation is qualified and professional staff with many years of experience in the production and installation process. The production facility is equipped with modern CNC machines, capable deliver a high-quality product.

Our offer represents the wide range of equipment designated for the marine market. The main offer is MED-certified approved marine systems. Covering wall and ceiling systems, a wide range of doors, and ship furniture. Custom-made products for navy or offshore market with honeycomb and shock absorb systems.

We manufacture all our products according to our customers' needs and specifications. Products comply with the latest regulations and as well marine trends. Willing to listen to suggestions from our Customers are giving a boost to constantly expanding our range of products and services.

The key benefits for our products are high quality of products and short delivery time. We rely on flexible terms of cooperation as well as professional customer service. Meeting the expectations of demanding customers is a greatly satisfying challenge for us

Sustainability is in our mutual interest, which is why, as a company, **SEC SYSTEMS** is committed to sustainable development with a low carbon footprint.

The additional benefit for customers is their project team with qualified personnel ready to provide a 360° solution. Commencing from design, production, and finally installation based on own Project Management. Our specialization is interior installation, HVAC, insulation. Installation, renewals, and full retrofits. Proven track of the successful project on marine, navy market and not only is proving are qualifications. Our team, a core value is on time and budget.

Our offer is addressed to Supply and Repair Companies, Repair and Newbuild shipyards, Owners, and all interested to work with us.

DOORS

- Interior doors are required to outfit all accommodations areas

The following range of MED approved doors are available:

- Class: A0 – A30
- Class: A60
- Class: B15

Following options are available:

- Double doors
- Windows
- Gas-tight
- Hose proof
- Weather tied
- Improved acoustic

Finish details:

- RAL painted
- PVC
- Custom made

- Interior doors are required to outfit all accommodations areas

Bulkhead systems designated for:

- dry rooms
- wet rooms
- technical rooms
- MED certified system for B and C fire class

Finish details:

- stainless steel
- RAL painted
- PVC
- Custom made
- Improved acoustic systems available up to 50 Db noise reduction
- MED approved Mineral board systems are also available
- Aluminium honeycomb system
- System designated for fast and easy installation

WALL SYSTEMS

CEILING SYSTEMS

- Complete various ceiling systems designated for all types of ships especially for Cruise and Ferry
- MED certified system for B and C, fire class

Finish details:

- RAL painted
- PVC
- Custom made

Wide range of systems:

- Self-supporting system, including the option
- with no visible joints
- Tile ceiling system
- Stripe ceiling system
- Improved acoustic systems available up to 50 Db noise reduction
- Aluminium honeycomb systems are also available
- System designated for fast and easy installation

SEC SYSTEMS manufactures the range of products necessary to equip every vessel in the world, regardless of its intended use. Our products will complement new build, conversion, or refit with the necessary materials to meet customer requirements and current legislation.

We offer a wide range of products with the best parameters on the market. The most important of those include ease of installation, high acoustic, and class requirements.

For more details visit our website or contact the commercial department.

INSPECTION DOORS AND REVISIONS

- Designated for fast and easy access required for confined spaces
- MED certified for B and C class systems

Wide range of required products:

- Bulkhead inspection doors single and double
- Ceiling inspection doors
- Various sizes and assignment
- Various access and opening options

Finish details:

- stainless steel
- RAL painted
- PVC
- Custom made

- Steel and aluminum constructions available

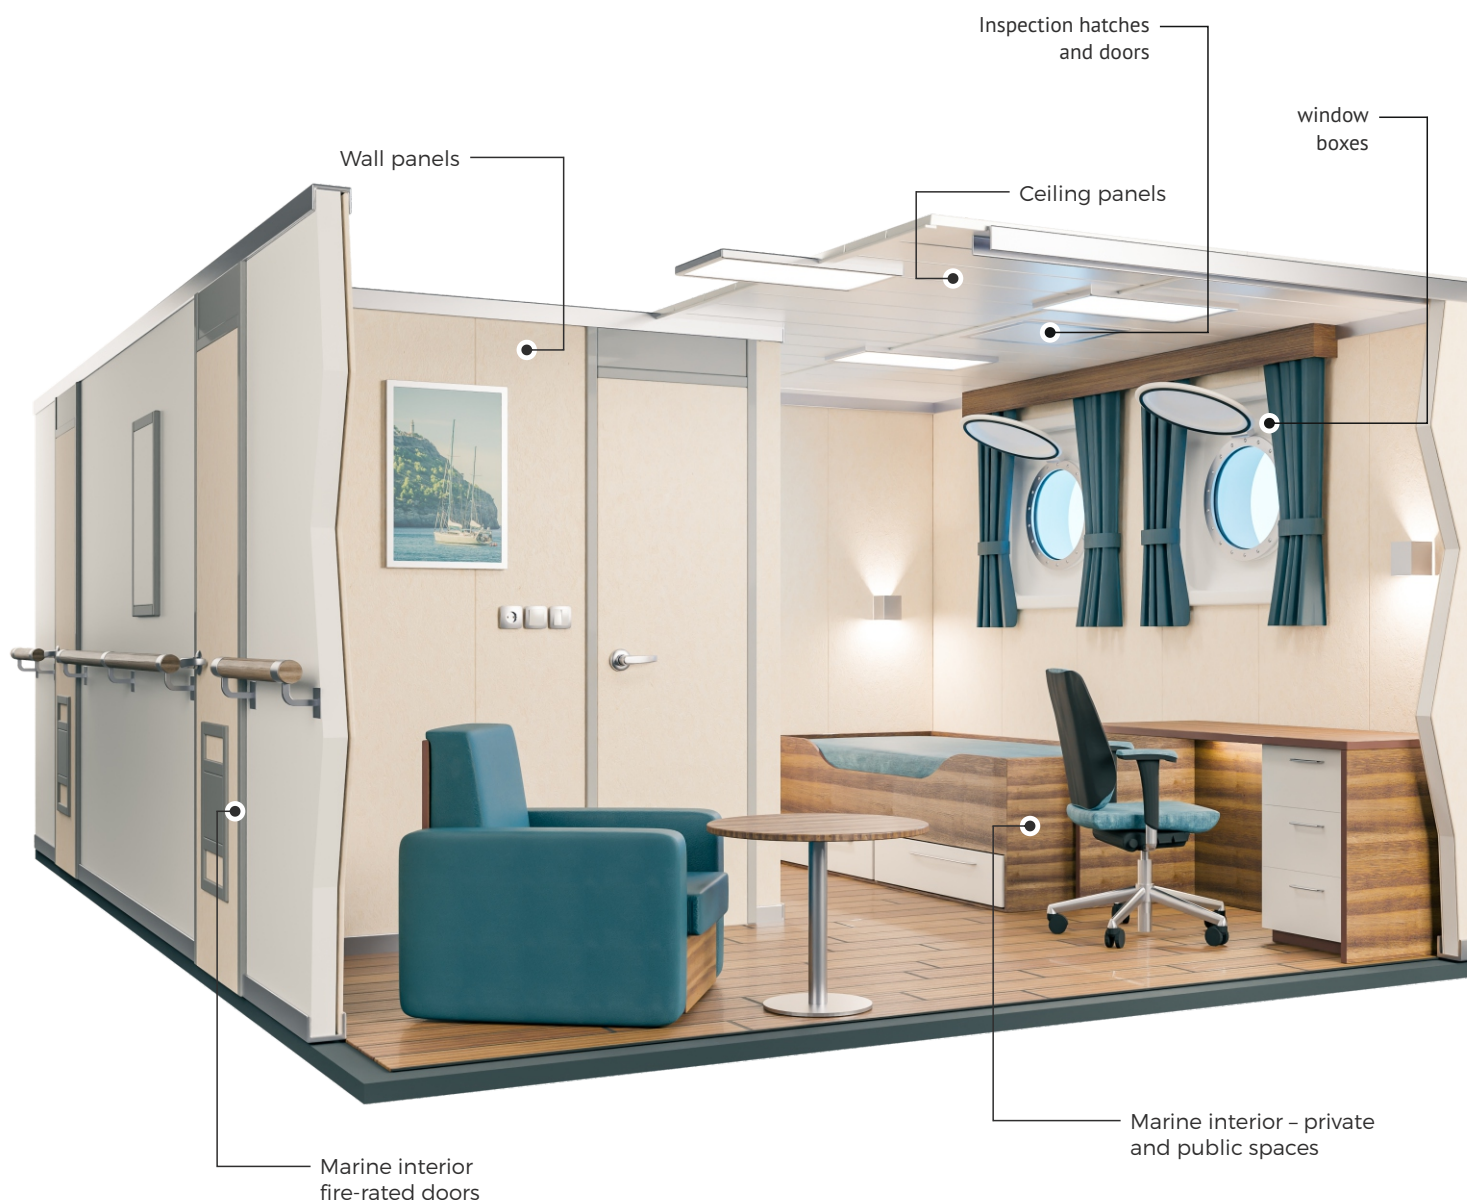

Options:

- single, double, suspended, standing, folding
- Non-standard: pull out beds

- Finish according to customer requirements

PULLMAN TYPE BEDS

ACCOMODATION MODULES

SEC SYSTEMS is capable to provide complete accommodation solutions for new builds, retrofits, or upgrades. We have the knowledge and capacity to provide furniture including metal, wet units, and much more. Contact us for more details if you are looking for a reliable partner in your project.

OTHER

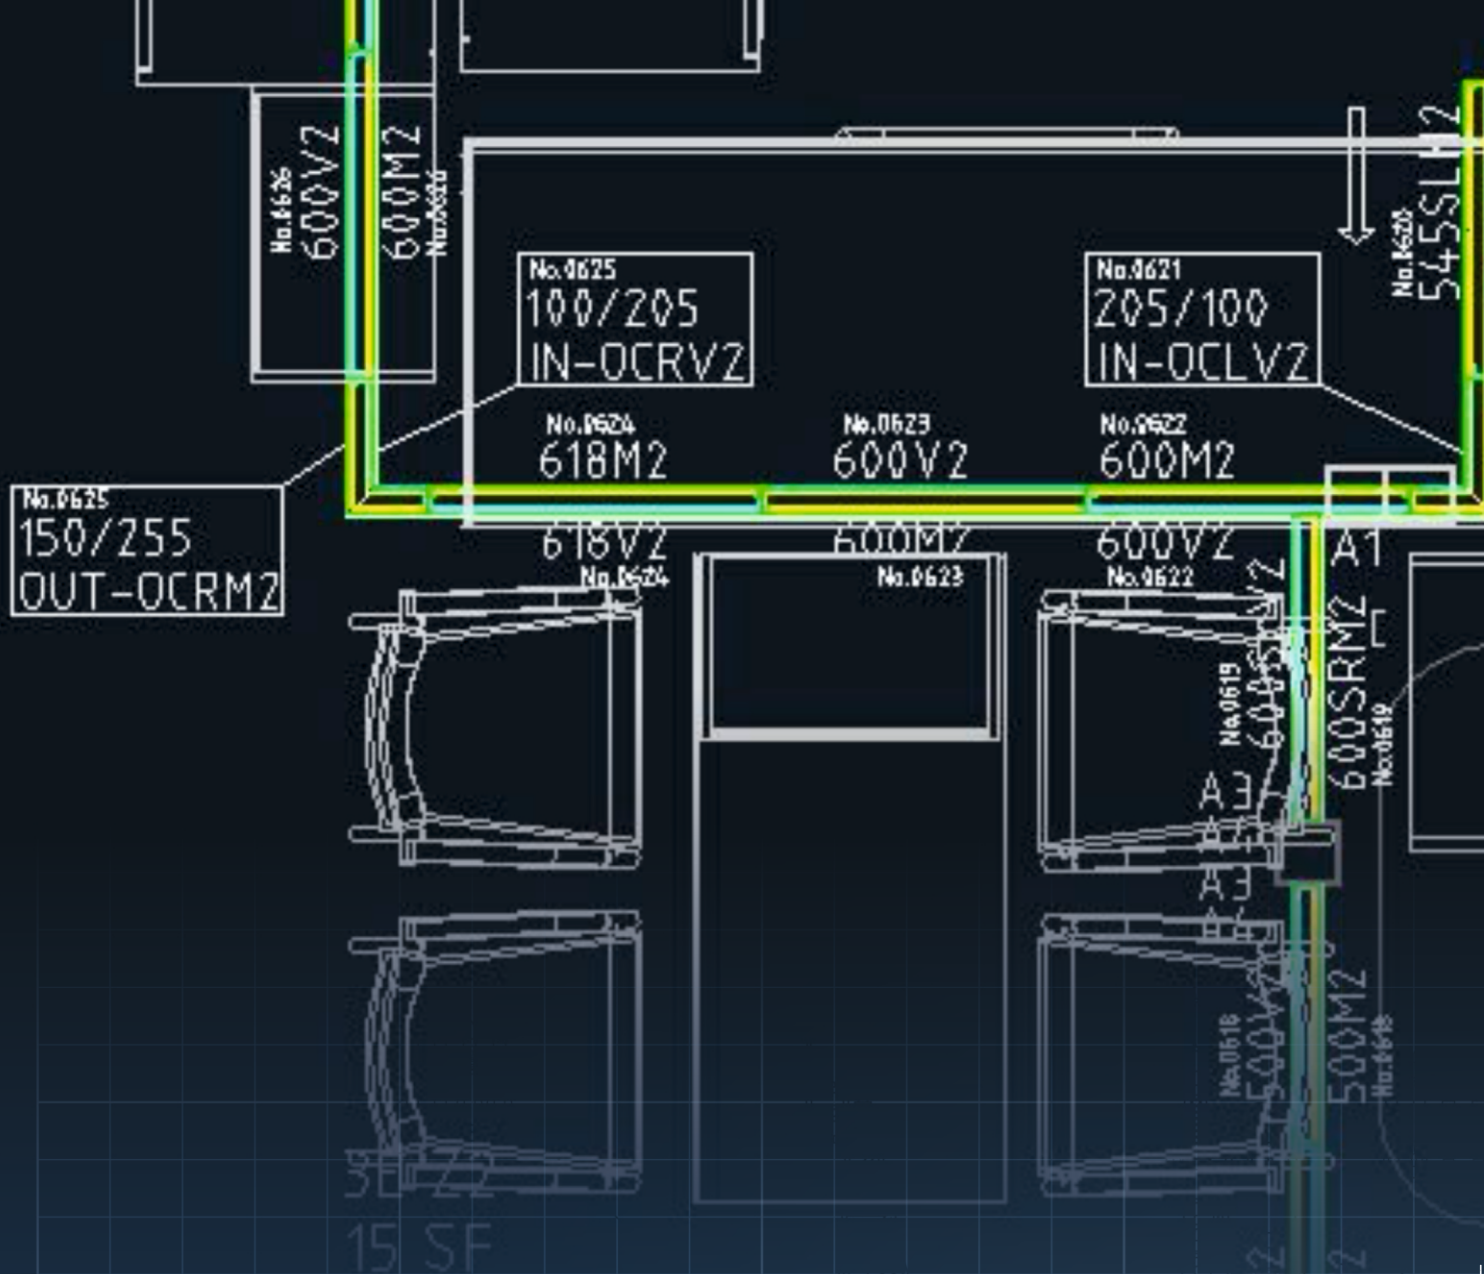

Metal furniture for specialized areas such as hospitals, warehouses, or cloakrooms.

We offer:

- furniture,
- beds,
- cabinets with electrical installation

Each order is treated individually and we propose a finish depending on the purpose of use and the customer's requirements.

For more details please visit our website or contact our Commercial Team.

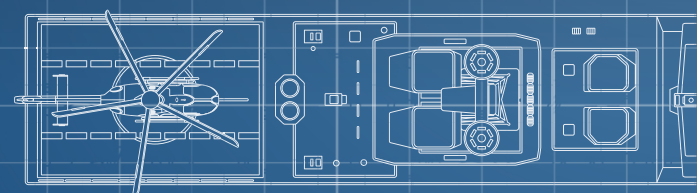

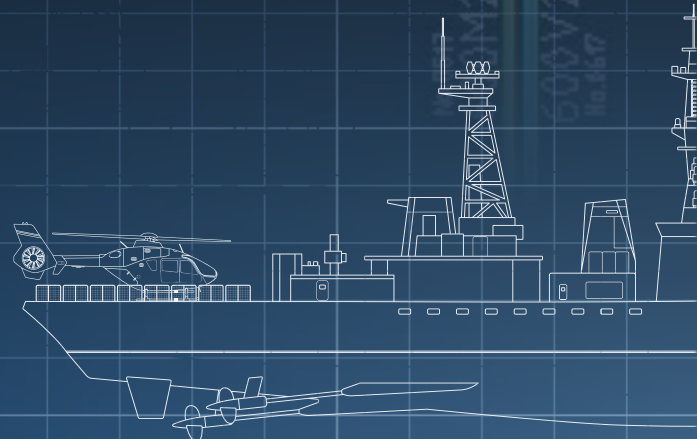

SEC SYSTEMS provides solutions for the production and installation of complete systems for Navy Units. The system is based on its developed system and custom-made for each project. Each project is considered individually by our Construction Department and followed by customized production.

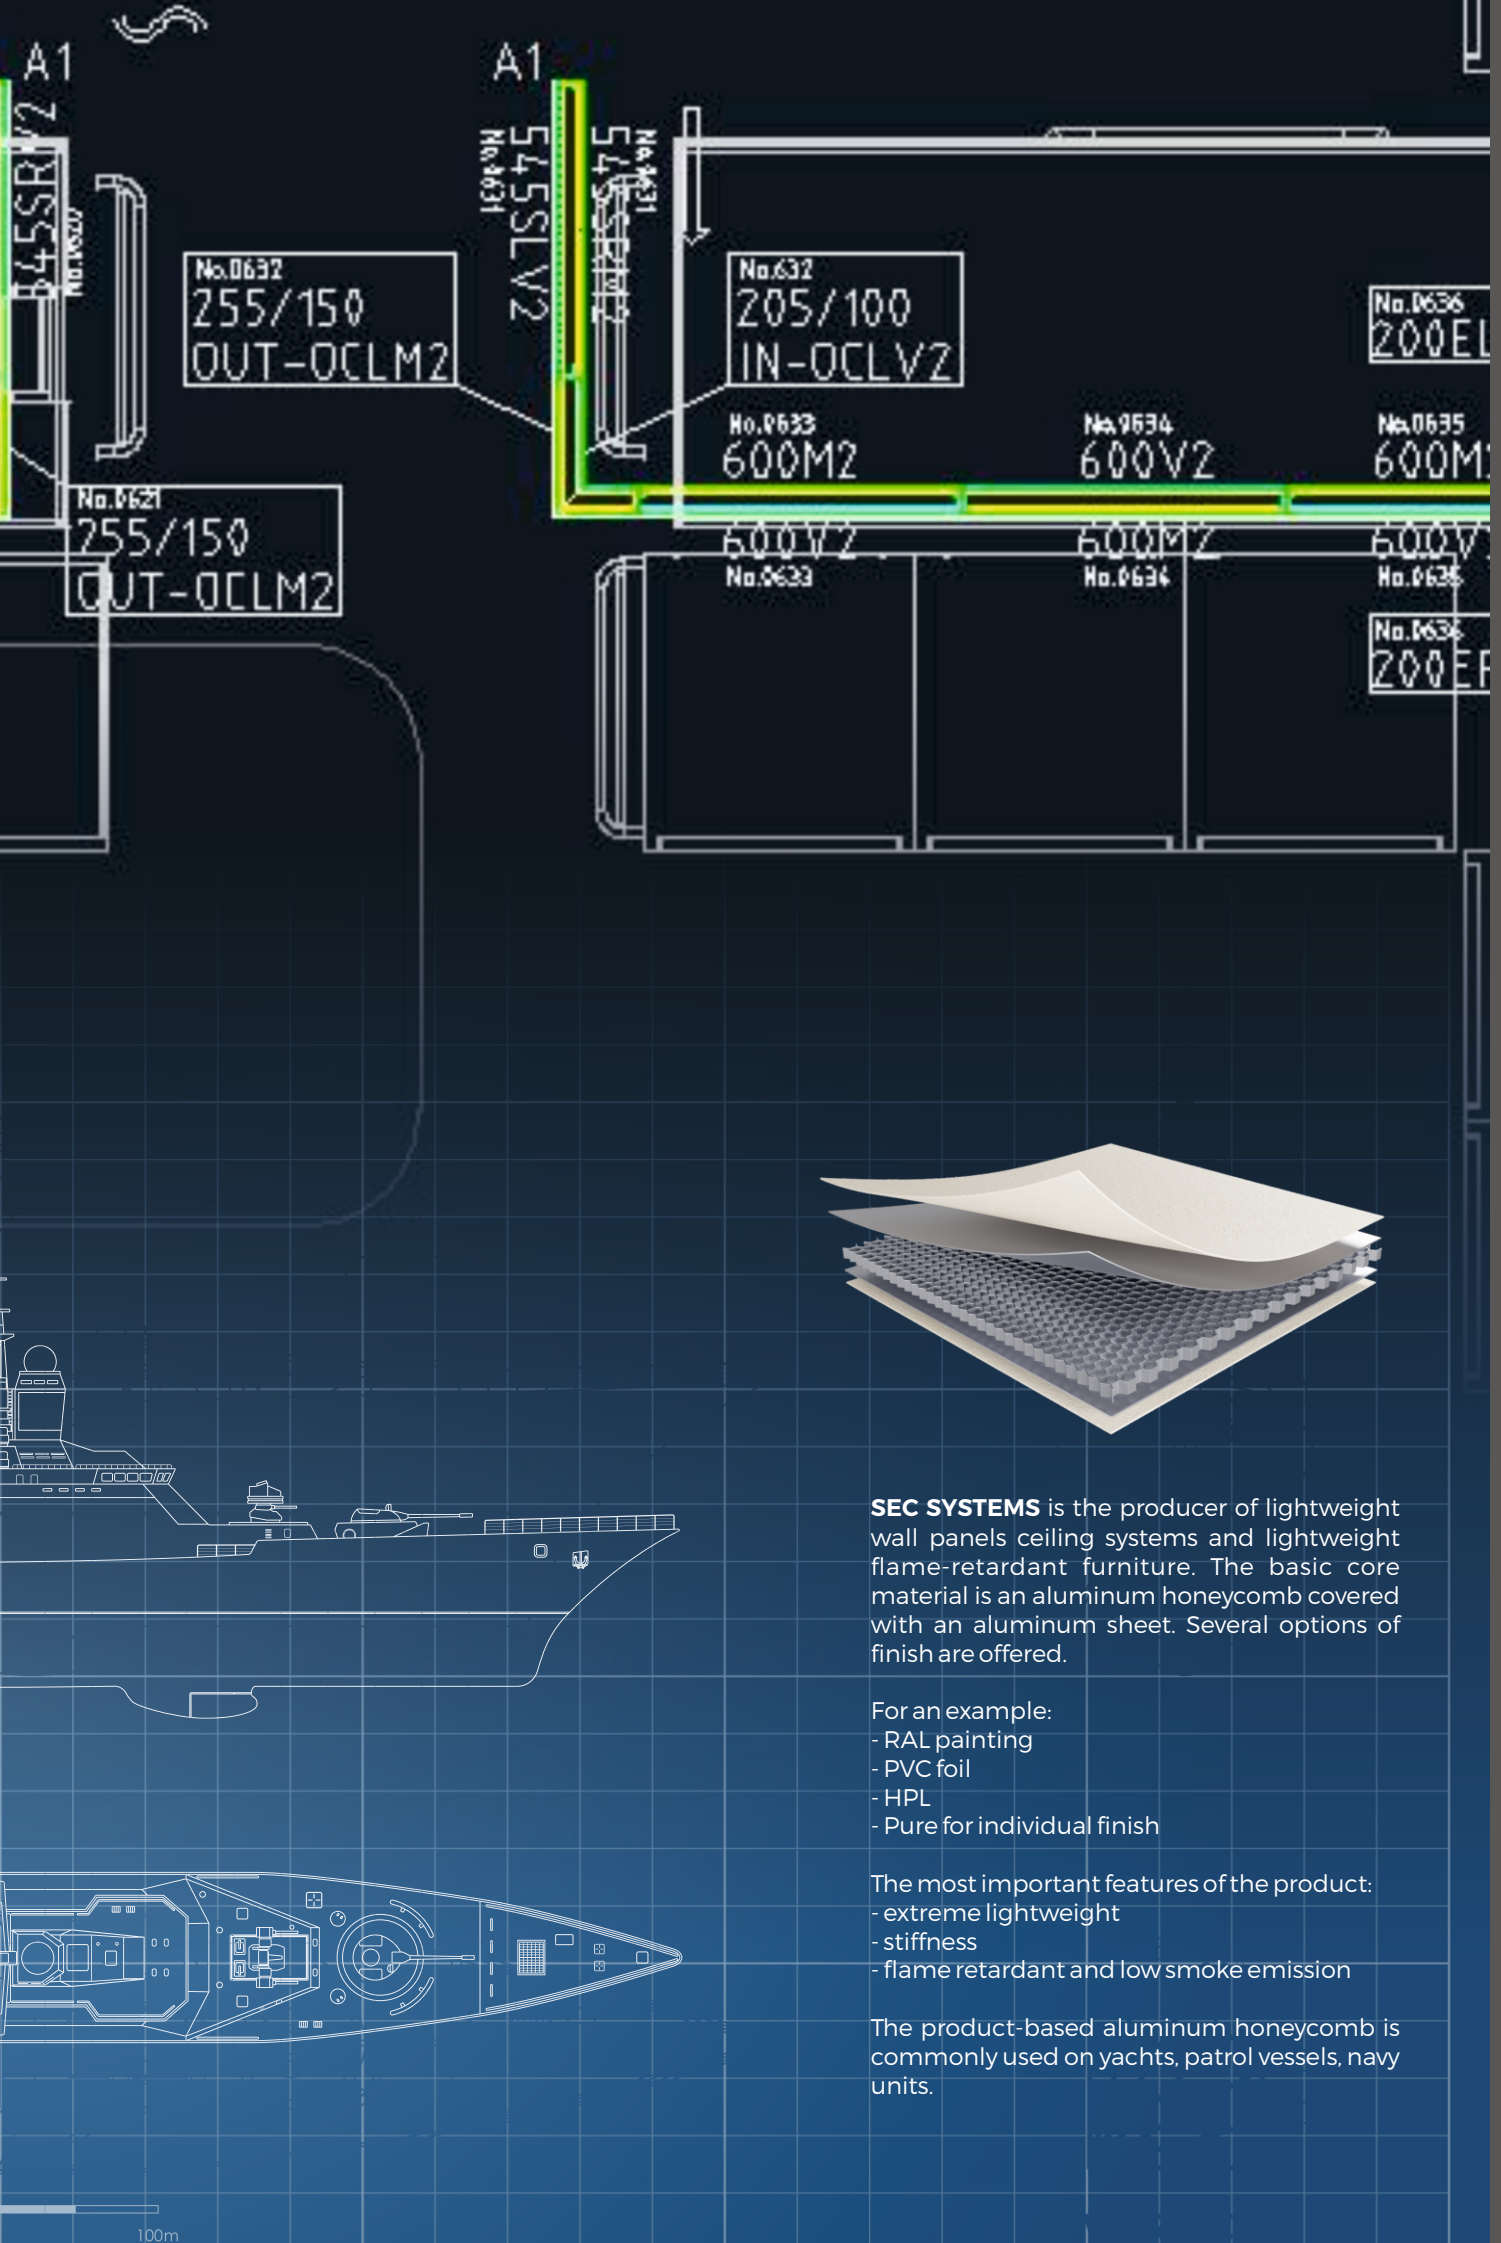

SEC SYSTEMS produce walls, ceiling panels, doors including inspection doors with aluminum honeycomb core as well furniture.

The most important benefits of our products are as follows:

- The very low specific weight of each product
- Strength with simultaneous resistance
- to deformation, very high shock absorption
- flame retardant
- expandable with additional parameters; e.g.
- noise reduction

SEC SYSTEMS, provide full process from the design stage, production, and final installation. With a proven successful track, our Project Management and Production facility is capable to complete the most demanding challenges on all Naval projects from repairs to new builds.

SEC SYSTEMS is the producer of lightweight wall panels ceiling systems and lightweight flame-retardant furniture. The basic core material is an aluminum honeycomb covered with an aluminum sheet. Several options of finish are offered.

For an example:

- RAL painting
- PVC foil
- HPL
- Pure for individual finish

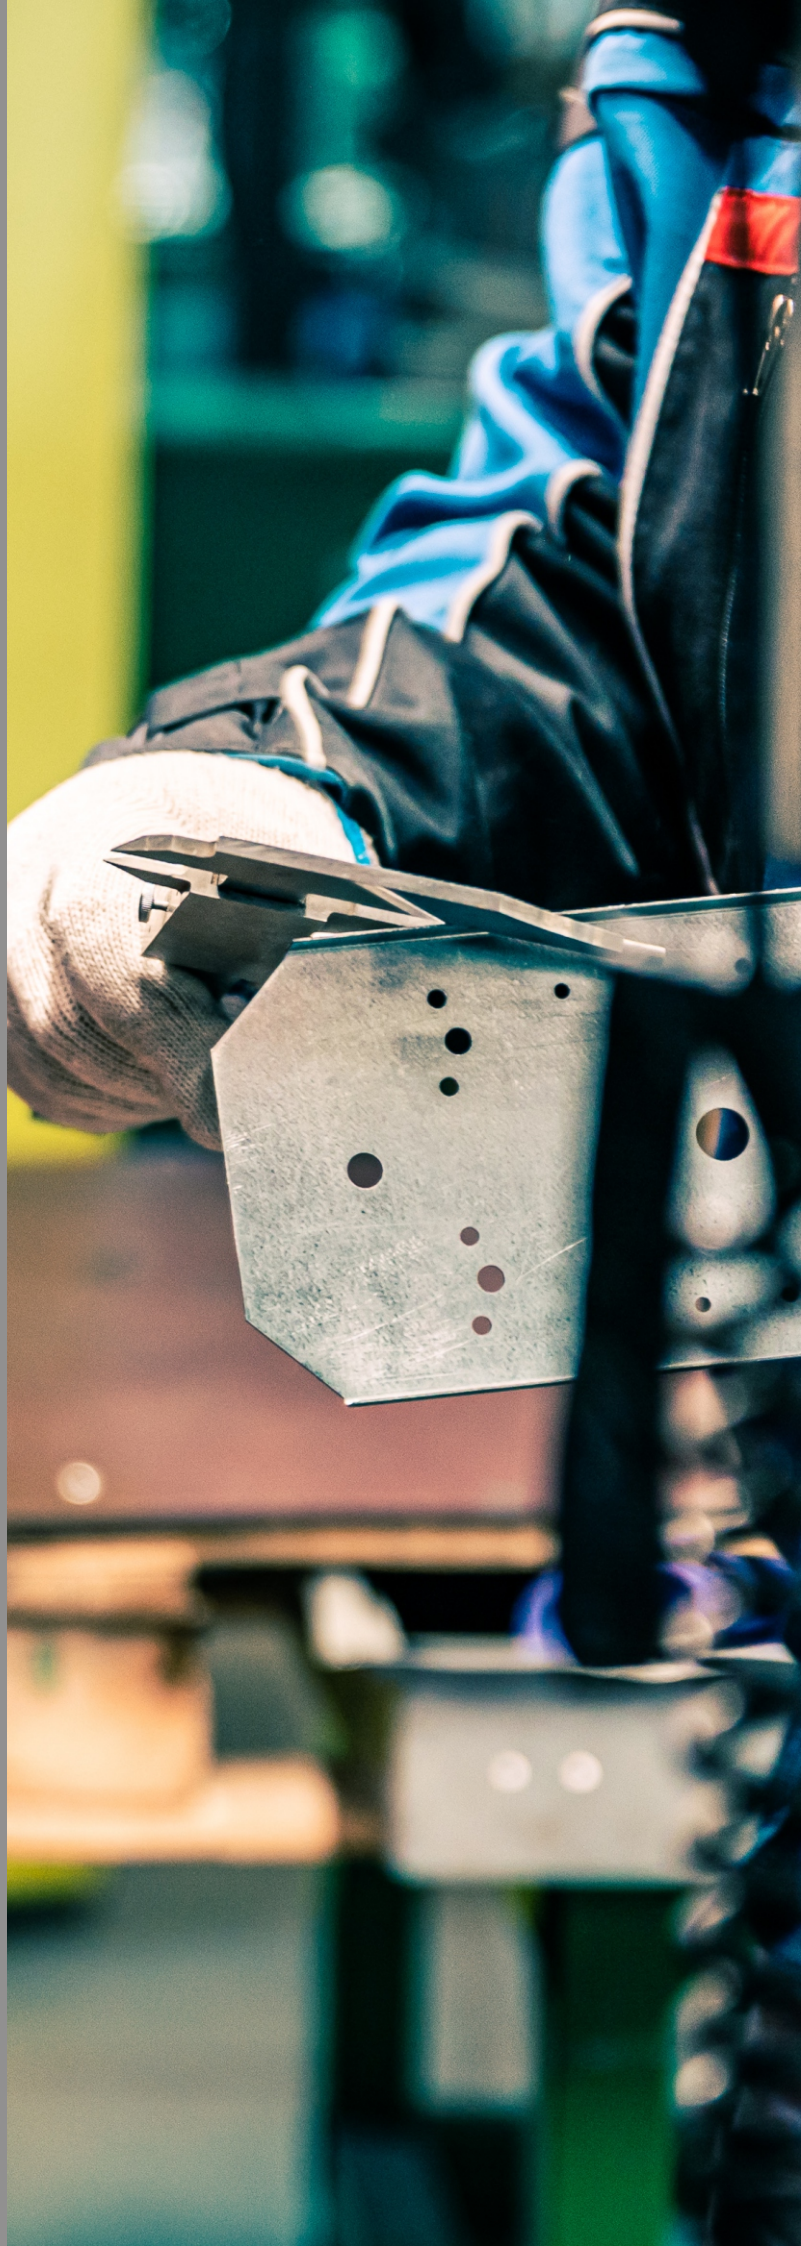

The most important features of the product:

- extreme lightweight
- stiffness
- flame retardant and low smoke emission

The product-based aluminum honeycomb is commonly used on yachts, patrol vessels, navy units.

SEC SYSTEMS has the experience, competence, and technological capacity necessary to manufacture steel and aluminum structures. Specializing in manufacturing lightweight steel structures for the interior and marine industry. The production of steel and aluminum structures is based on combining our design process customer requirements, regulations following standards, and certification of Classification Societies and not only.

Thanks to our broad construction and competence based on our design department, we carry out orders from A to Z - from the analysis of the request, through the construction process, to the implementation and final assembly. As a result, our projects can meet the highest standards. The fully equipped production line including painting is the added value to our customer, as all process is under control and in the warehouse. For more details visit our website or contact the commercial department.

The **SEC SYSTEMS** have experience in providing the following services:

Interior installation and refit for marine especially passenger and cruise market as well naval industry

HVAC – we can provide a full solution from design, calculation followed by the installation process. The maintenance of the system is also in our area of focus

Insulation – installation of new complete insulation system on offshore units especially for the renewable energy market, but as well for marine and naval industry.
